DETAILED ACTION

Status of Claims

1. Applicant's response filed 8/24/2004 is acknowledged and entered.
2. Claims 1-9 are pending.

Election/Restrictions

3. Applicant's election of Group I (Claims 1-2) in the reply filed on 8/24/2004 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
4. Claims 3-9 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to ***nonelected inventions***, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 8/24/2004.
5. Applicant has elected the following species for the elected invention (Claims 1-2):

The elected compound is 8-(5*H*-dibenzo[*b,d*]borol-5-yloxy)quinoline, which has the following structure:

Art Unit: 1639

Priority

6. This application claims priority to a provisional application 60/250,202 filed 11/30/2000.

Information Disclosure Statement

7. The information disclosure statements (IDS) submitted by applicant filed on 9/25/2002, 6/13/2002, and 6/27/2003 are acknowledged and considered as noted on PTO-1449.

Oath/Declaration

8. The oath or declaration is missing.

A properly signed oath or declaration in compliance with 37 CFR 1.63, identifying the application by the above Application Number and Filing Date, is required. Additionally, it is noted that the Notice to File Missing Parts of Application, mailed March 27, 2002, has informed applicant of the missing oath or declaration.

9. Please note: Applicant's *specifically* elected species that is 8-(5*H*-dibenzo[*b*, *d*]borol-5-ylxy)quinoline (see paragraph 5 above) was searched and was not found in the prior art. Also, see MPEP § 803.02 (emphasis added):

On the other hand, should no prior art be found that anticipates or renders obvious the elected species, the search of the Markush-type claim will be extended. If prior art is then found that anticipates or renders obvious the Markush-type claim with respect to a nonelected species, the Markush-type claim shall be rejected and claims to the nonelected species held withdrawn from further consideration. ***The prior art search, however, will not be extended unnecessarily to cover all nonelected species.*** Should applicant, in response to this rejection of the Markush-type claim, overcome the rejection, as by amending the Markush-type claim to exclude the species anticipated or rendered obvious by the prior art, the amended Markush-type claim will be reexamined. The prior art search will be extended to the extent necessary to determine patentability of the Markush-type claim. In the event prior art is found during the reexamination that anticipates or renders obvious the amended Markush-type claim, the claim will be rejected and the action made final. Amendments submitted after the final rejection further restricting the scope of the claim may be denied entry.

Art Unit: 1639

Thus, the search was expanded to non-elected species, which *were* found in the prior art. (See rejections below).

Claim Rejections - 35 USC § 102

10. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

11. Claims 13-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Patel (US Patent 5,348,947).

Patel disclose the structure of the presently claimed compound (col. 1, lines 20-68; col. 2, line 25 to col. 4, line 21). For example the compound of Patel wherein X and Y are alkyl, A is O, i.e. oxygen, R₅ and R₄ are H, and R, R₁, R₂, R₃ are H would read on claimed compound wherein Ar¹ and Ar² are substituted aryl, W is O, R^a, R^b are the same and are lower alkyl, and R^c, and R^c are the same and are aryl. Thus the compound of Patel anticipates the presently claimed compound.

12. Claims 13-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Patel (US Patent 5,348,948).

Art Unit: 1639

Patel disclosed the structure of the di(4-chlorophenyl)borinic acid 8-hydroxyquinoline ester, which is claimed in claim 2, (col. 1, line 49 to col. 2, line 14). Therefore the compound of Patel anticipates the presently claimed compound.
